Verge and Ditch

Votex has developed a series of machines especially for market gardeners and fruit growers that pulverise wood trimmings with a diameter of up to 10 cm. The shredders are suitable for front and trailed mounting, or even for both. These are compact machines that are available at a 0.8 to 3.0 metre operating width.

The Votex shredders are used worldwide and can be used for multiple applications.

Orchards, fruit growers and vineyards

The shredder can be used to shred pruned vines, mow grass or weeds.

Agriculture and horticulture

For mowing and shredding grass, corn stalks, reed, tobacco stalks, sunflowers, (mulch) remnants of weeds and tree crops.

Forestry and meadows

For shredding branches, brushwood, keeping paths / roads accessible or mowing very high and thick grass in nature areas or meadows.

Public services and landscaping

To cut grass along roads and paths, sports fields, parks, airports, rough land, abandoned urban areas and / or brushwood.

Shredder W series

The Votex W is a line of light pulverisers, specially constructed for market gardeners and fruit growers, available in working widths from 0.8 – 1.00 and 1.25 m. All versions are capable of pulverising wood with a diameter up to 4 cm and heavy claw flails and adjustable rake teeth are fitted as standard.

The mowing height can be adjusted by changing the height of two steel rollers.

Basic version

- Light pulverisers, specially constructed for market gardeners and fruit growers
- Available in working widths from 0.8 – 1.00 and 1.25 m
- Capable of pulverising wood with a diameter up to 4 cm
- Heavy claw flails and adjustable rake teeth are fitted as standard

Specifications Votex W series

	W80	W100	W125
Mounting	rear		
Category	category I		
Maximum reach (relative to tractor axis)	40 cm	50 cm	62 cm
Flails			
Weight hammer flail	1600 gram		
Number of hammer flails	6	8	10
Power train			
Min. PTO power (kW/hp)	10 / 14	14 / 19	18 / 24
PTO drive shaft	540 RPM		
Dimensions			
Cutting width	74 cm	94 cm	119 cm
Overall width	92 cm	112 cm	136 cm
Weight	200 kg	247 kg	287 kg

Shredder FS series

A special machine with an extra low construction for market gardeners and fruit growers. The FS is available in a 1.50 and 1.75 width and is suitable for pulverising wood with a diameter up to 6 cm. The low construction (only 42 cm) makes this pulveriser perfectly suitable for operations in orchards with low hanging branches that make it impossible to work with a normal machine.

On the standard FS, the three point frame can be mounted 25 cm from the middle in order to give the machine a maximum mitre position of 1.00 m compared to centre of the tractor. The Vortex FS is also available in a FS-V version with 30 cm mechanical or hydraulic mitre adjustment option by means of parallelogram arms between the three point frame and the mowing part.

Basic version

- Light pulverisers, specially constructed for market gardeners and fruit growers
- Low construction (only 42 cm)
- Available in a 1.50 and 1.75 width
- Capable of pulverising wood with a diameter up to 6 cm

Specifications Vortex FS series

	FS150	FS150V	FS175V
Mounting	rear		
Category	category I and II		
Maximum reach (relative to tractor axis)	100 cm	105 cm	112 cm
Flails			
Weight hammer flail	1600 gram		
Number of hammer flails	12	12	14
Power train			
Min. PTO power (kW/hp)	22 / 30	22 / 30	26 / 35
PTO drive shaft	540 RPM		
Dimensions			
Cutting width	144 cm	144 cm	169 cm
Overall width	164 cm	164 cm	192 cm
Weight	455 kg	507 kg	530 kg

Shredder FLV series

The Votex FLV is a medium weight pulverising machine, designed for pulverising wood and debris by market gardeners and fruit growers, up to a diameter of 5 cm. The machine is also suitable for landscape maintenance and the mowing of wastelands. The FLV is available in operation width sizes; 1.25 – 1.50 – 1.75 – 2.00 and 2.25 m.

All machines are fitted with a mechanical adjustable mitre option.

Basic version

- Medium weight pulverising machine
- Designed for pulverising wood up to a diameter of 5 cm
- Available in operation width sizes; 1.25 – 1.50 – 1.75 – 2.00 and 2.25 m
- Fitted with a mechanical adjustable mitre option

Weight	455 kg	500 kg	575 kg	615 kg	655 kg

Shredder GU series

The Vortex GU is the heaviest pulveriser in the assortment. An extremely solid machine, available in working widths from 2.00 to 3.00 m, good for pulverising wood with a diameter up to 10 cm. Also suitable for all kinds of landscape maintenance and the mowing of wastelands.

The frame and the mowing head of the GU are constructed symmetrically. This makes it possible for the three point frame to be mounted on two sides of the mowing head. This way it can be front or rear mounted. The needed gear box with a continuing shaft for front mounting is an option. An excellent option when frequent swopping from rear to front mounting is necessary. This system is available for all GU machines and is provided with a hydraulic mitre adjustment option of 50 cm.

Basic version

- The heaviest pulveriser in the range
- Designed for pulverising wood up to a diameter of 5 cm
- Available in working widths from 2.00 to 3.00 m
- Also suitable for all kinds of landscape maintenance and the mowing of wastelands

Specifications Vortex GU series

	GU200	GU225	GU250
Mounting	front- or rear		
Category	category I and II	category II and III	
Maximum reach (relative to tractor axis)	140 cm	162 cm	172 cm
Flails			
Weight hammer flail	1600 gram		
Number of hammer flails	16	18	20
Power train			
Min. PTO power (kW/hp)	33 / 45	37 / 50	38/56
PTO drive shaft	540/1000 RPM		
Dimensions			
Cutting width	194 cm	219 cm	244 cm
Overall width	220 cm	245 cm	270 cm
Weight	695 kg	745 kg	795 kg

Extra option

Votex strip cleaner

The hydraulically powered “strip cleaner” is used for hauling branches / vines in the area of the shredder. Optionally can be mounted on the machine and is powered by the tractor hydraulics.

This machine cleans the pruned area, thanks to a fast-rotating rotor equipped with 4 rubber spatulas that sweep away all debris from the ground and place it in reach of the shredder.
