

VACUUM TRAILERS

Why choose for Votex?

With the Votex vacuum trailer range, we offer some of the most versatile and high-performance vacuums available. These machines are designed for year-round use and can be deployed for a wide variety of applications.

By simply changing the working shaft, the vacuum trailer can quickly be adapted to different tasks such as mowing, verticutting, sweeping and collecting in a single pass. This flexibility makes Votex vacuum trailers highly efficient and multifunctional machines in daily operation.

The compact VT30 and VT40 vacuum trailers can be equipped with a hand-operated suction hose with a total length of 6 metres, allowing waste materials to be effortlessly removed from hard-to-reach areas. These models also feature a high tip system with a tipping height of 1.6 m, enabling easy unloading into containers or trailers.

The larger VT80 and VT120 models are designed for high-capacity professional use and can optionally be equipped with a joystick-operated suction arm (robot arm), enabling operators to collect material efficiently from edges, corners and difficult locations while maintaining maximum productivity.

Brand of Alamo Group The Netherlands

Tailored to your needs

Which model is right for your application?

S-Series: Hydraulic brush drive, ideal for sweeping and collecting grass or leaves.

M-Series: Mechanical drive of the suction head, prepared for additional tools such as a flail shaft or verti-cut shaft, thanks to the interchangeable working system in the suction head

S-Serie

Compact sweeper & collector specialist

The Votex S-serie is a compact and agile vacuum trailer equipped with a hydraulic brush drive, making it ideal for sweeping and collecting grass, leaves and light debris on sports fields, parks and other green areas.

A powerful fan with V-belt drive ensures efficient suction and reliable performance, while the compact design allows easy manoeuvring around obstacles and on smaller sites.

The S-serie is the perfect solution for professionals looking for a reliable, efficient and user-friendly machine for daily maintenance.

M-Series

Compact multifunctional vacuum sweeper

For sweeping, verti-cutting, or mowing and collecting on city parks, public green spaces and sports facilities, the M-Series offers multifunctional vacuum sweepers designed for professional use. Thanks to their compact to high-capacity design, these machines are highly manoeuvrable while still delivering maximum performance in both confined and large-scale environments.

With hopper capacities of 3 m³ (VT30M), 4 m³ (VT40M), 8 m³ (VT80) and 12 m³ (VT120), the machines are ideal for sweeping and collecting a wide variety of materials. They effortlessly remove leaves, grass clippings, verti-cutting residues, pruning waste and litter, ensuring clean and well-maintained surfaces.

All models can be equipped with various mowing shafts as well as a verti-cut shaft. Thanks to the quick and easy shaft change, the machines can be adapted to multiple tasks, making the Votex vacuum trailer range a truly multifunctional solution for both sports field maintenance and large-scale green area management.

M-Series

Compact performance for precision work

For sweeping, verti-cutting, or mowing and collecting on city parks, public green spaces and sports facilities, the VT30M and VT40M offer compact, multifunctional solutions for professional use. Thanks to their compact dimensions, these machines are highly manoeuvrable and easy to operate in areas with obstacles or limited space.

With hopper capacities of 3 m³ (VT30M) and 4 m³ (VT40M), they are ideal for collecting leaves, grass clippings, verti-cutting residues, pruning waste and litter. Both models can be equipped with various mowing shafts and a verti-cut shaft. The quick and easy shaft change makes them highly versatile for daily maintenance tasks.

High capacity for large-scale efficiency

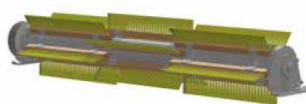

For intensive operations and larger areas, the VT80 and VT120 deliver maximum capacity and productivity. With hopper capacities of 8 m³ and 12 m³, these machines are designed for high-volume material collection with minimal downtime.

Built for demanding conditions, they combine powerful suction performance with robust construction. The interchangeable working system allows the use of mowing and verti-cutting shafts, making them ideal for large-scale green maintenance, municipalities and contractors.

Optimal turf management

For a healthy and resilient turf surface, Vortex vacuum trailers can be equipped with various verti-cutting shafts. These effectively remove thatch and moss, improve soil aeration and stimulate dense, vigorous grass growth.

By verti-cutting and collecting the material in one pass, surfaces remain clean and ready for immediate use. This makes the machines ideal for sports fields, golf courses and intensively used green areas.

Specification	VT30	VT40
Hopper capacity	3 m ³	4 m ³
Required power	35–70 hp	45–70 hp
PTO speed	540 rpm	
Tipping system	High tip (1.6 m)	High tip (±2.1 m)
Tyres	26.5x14.00-12	500/50R17
Weight (approx.)	±1,200 kg	±1,600 kg
Suction head width	1,5 meter	1,8 meter
Fan diameter (cm)	70	85
Dimensions (cm)	405*190*185	481*216*230
Suction Hose diameter (cm)	20	20
Suction Hose length (cm)	500	500

VT30/VT40

- » Sweep, verti-cut or mow and collect in one pass
- » Large tires for low ground pressure
- » Adjustable air outlet
- » High working speed
- » Can be configured online according to your needs
- » Powered by power take-off (PTO)
- » Equipped with hand-held suction hose 5 m Ø 200 mm (VT30M)
- » Roboarm and hose - incl joystick control (Ø 300mm) (VT40M)
- » Designed for year-round use across multiple applications
- » Optional multiple work axes available
- » Operated by a single operator
- » European type approval for road transport

Specification	VT80	VT120
Hopper capacity	8 m ³	12 m ³
Required power	65-130 hp	65-130hp
PTO speed	540 rpm	
Tipping system	Hydraulic floor chain	
Tyres	500/50R17	500/50R17
Weight (approx.)	±2,800 kg	±3,500 kg
Suction head width	2,1 meter	2,1 meter
Fan diameter (cm)	96	96
Dimensions (cm)	610*230*295	730*230*295
Suction Hose diameter (cm)	35	35
Suction Hose length (cm)	400	400

VT80/VT120

- » Sweep, verti-cut or mow and collect in one pass
- » High-capacity design for large-scale operations
- » Large tyres for low ground pressure
- » Adjustable air outlet for optimal airflow control
- » High working speed for maximum productivity
- » Configurable to your needs with multiple working shafts
- » Powered by power take-off (PTO)
- » Optional suction hose for hard-to-reach areas
- » Hydraulic floor chain for controlled and efficient unloading
- » Designed for year-round use across multiple applications
- » Operated by a single operator
- » European type approval for road transport
